

Le Petit Lutin Daycare and Gestionnaire A Successful Partnership

Easy-to-Use Management Software

Stéphanie Dugas Crousset, an accounting clerk at Sept-Îles' Le Petit Lutin daycare centre, has been using Gestionnaire since 2009. In contrast to other management software systems with which she has worked before, Ms Dugas finds Gestionnaire to be a comprehensive solution. She especially appreciates that Gestionnaire is integrated management software.

"Gestionnaire is simple software which is easy to use. It has all the essential functions for daycare centre management - it's fantastic."

A Gestionnaire user for three years now, Ms Dugas finds the software particularly worthwhile in the preparation of annual reports. Gestionnaire allows her to export files and e-mail them, which she considers a real added value.

Ms Dugas feels that Gestionnaire's main strength is its ease of use. However, she still recommends taking a Gestionnaire course because the kind of training provided really enables users to learn about all the solution's features, maximize software use, and simplify centre management.

"I can't even imagine running a daycare centre without Gestionnaire. I'd recommend it to anybody without hesitation!"

About Le Petit Lutin

Founded in 1976, Le Petit Lutin is located in Sept-Îles, Quebec. Its general manager is Marc Lalancette. The centre has two facilities: one with 45 children, including five babies, and one with 37 children, including five babies.
